

# Registration Bulletin

## Spring 2007 Herd Inventories

Spring 2007 Herd Inventories are being mailed out the first week in January. The report will list all animals of assessment age on the inventory date according to Association records for Spring herds as of 1-01-07. Please mark any animals that have been culled and their disposal codes, and add any new animals to the inventory which are not listed. Find Spring Herd Inventories on-line under "Registration Information" at [www.redangus.org](http://www.redangus.org).

## 45 day window

This system allows a 45 day window opportunity for those animals that calve 45 days prior to, or 45 days after their respective Spring inventory 1/01/07 - 6/30/07 without having to change calving seasons. Spring Herd Inventories 11/15 (45 days before 1/01) to (6/30 45 days after) 8/15.

## Barn Sheets/Ultrasound Data Collection

Barn sheets must be requested on registered animals for the collection of ultrasound data. After ultrasound data is processed, we send it back to the owner of the animal(s). If summary data is to be sent to parties other than an owner of the animal(s): example, e-mail or fax to a bull test manager, sales manager, etc. please be sure that special instructions be sent to the lab where the data will be processed. The lab will include those instructions in an e-mail to the National Office with data. Barnsheets may also be

obtained via the website, once results have been returned to the RAAA office you may also access those via the website at [www.redangus.org](http://www.redangus.org).

## REMINDERS...

■ The Rules and Regulations require a donor dam and service sire used for embryo transplant be on file in the National Office as being typed (not parent verified). Parent verification of embryo transplant calves is not required.

■ Many breeders question why 'H' is not available on RRTS as a possible reg-type, like 'R' or 'T'. A reg-type of H is assigned by the computer when processing data where a calf is out of a non-owned sire. We do not include the 'H' as a possible reg-type because calves should not be put 'on hold' if the sire owner is the same as the dam owner at the time of breeding. If you have calves to be reported and DO NOT want non-owner bull permits applied at that time (if they are available in your inventory) then send INSTRUCTIONS with your data to indicate that NON-OWNER BULL PERMITS SHOULD NOT BE APPLIED AT THIS TIME. Therefore, list the calves at an 'R' status when submitting information. We will not apply the AI certificates.

■ If calves are put on hold for nonowner bull permits at the time information is processed, it will be the member's responsibility to either apply the permits and
